The Problem

4 million refugee children who currently under UNHCR's mandate were not able to attend school in their last academic year.

Global rates: access to education

Sources: UNESCO, UNHCR (2018)

Our Solution

With our application, we use technology to give access to education to refugee children aged 9-13 years old.

Our Program's Format

The App

- Modules on Mathematics, English and Arabic Alphabet;
- Animated characters;
- Explanatory videos;
- Practical problems.

NGO Partnerships

In order to reach our beneficiaries, we seek partnerships with local NGOs that serve refugees.

Currently, we have a partnership with Seeds of Humanity Greece.

Sponsors

Sponsors are supporters that help us cover our operational costs. We have been supported by Global Changemakers and the Build Lab. Currently, we are looking for people who would be willing to contribute with 5-20 USD/month for 12 months.

Swiss University Innovation

Our Impact

Pilot Program

- 73 children directly impacted;
- 20 families indirectly impacted;
- 3 refugee volunteers;
- 80 hours.

Out of all children in our pilot program:

- 88.9% said they would recommend RefEd to a friend;
- 80% said RefEd made them change what they want to be growing up;
- 77.3% said RefEd made them want to continue learning.
